**DETAILED ACTION**

Claims 1-59 are pending in this Office Action.

**Election/Restrictions**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19 and 31-49, drawn to an interface adapter for coupling the host computer to computer network, classified in class 709, subclass 250.
- II. Claims 20-30 and 50-59, drawn to direct memory accessing, retrieving the data and providing the response including the data requested to the client or requester, classified in class 709, subclass 213.

The inventions are distinct, each from the other because of the following response:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as accessing a memory, retrieving the data and providing the data to the requestor. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, hence it creates serious administrative burden on the examiner and therefore restriction for examination purposes as indicated is proper.

Art Unit: 2151

Applicant is advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

In accordance with 35 U.S.C. 133, a shortened statutory period of one month (not less than 30 days) is hereby set forth to this Office Action. See MPEP 710.02(b).

**Conclusion**

A telephone call was made to Charles Gorenstein on June 21, 2005 to request an oral election to the above election/restriction requirement but did not result in an election being made.
